		<p>4c. 12 of 16 canteen seats removed from use.</p> <p>4d. Office staff re-positioned.</p> <p>4e. 2m spacers added to factory flooring (including shop floor clocking in/out stations).</p> <p>4f. Hi-Vis vests worn by all employees.</p> <p>4g. Give-way system introduced outside production office and works canteen.</p> <p>4h. Office toilets restricted to one person at a time.</p> <p>4i. Floor marking used in shop floor toilets.</p> <p>5. Desks, Machines, shared PC's, equipment – including photocopiers, touch screens are to be cleaned down at the start and end of each use.</p> <p>6. Tissues placed at strategic locations throughout the site.</p> <p>7. Non-sharing of Gemba board pens implemented.</p>				<p>5. Monitor &amp; review.</p> <p>6. Ensure stocks are well maintained.</p> <p>7. Ensure stocks are well maintained.</p> <p>8. Ensure sufficient stock is maintained.</p> <p>9. Face masks to be located in the surgery.</p> <p>9. Ensure stocks are well maintained.</p> <p>10. Monitor &amp; review.</p> <p>11. All relevant areas to be issued with cleaning facilities.</p> <p>12. Monitor &amp; Review</p> <p>13. Ensure doors &amp; windows are kept open where practical.</p>	<p>9. Departmental manager / supervisor</p> <p>10. Paul Reeves / Maintenance</p> <p>11. Paul Reeves / departmental manager / supervisor.</p> <p>12. HR / Departmental Heads</p> <p>13. All Staff</p>	
--	--	---	--	--	--	---	--	--

		<p>8. Face masks added to surgery inventory for the protection of 1<sup>st</sup> aiders / casualties.</p> <p>9. Face masks / coverings are to be worn in all buildings at all times. If employees can prove that they have received both vaccinations and a period of 14 days has elapsed they can be exempt from the mandatory wearing of a face covering, however, they must still wear a face covering where social distancing cannot be maintained. Visitors / Contractors still must wear face masks when onsite at all times regardless of their COVID-19 vaccination status.</p> <p>10. Social distancing screens / side to side and back to back working implemented where 2m distances are difficult to maintain.</p> <p>11. Shop floor touch surfaces (i.e. machine control panels, emergency stop buttons, clocking stations, gauges etc.) are to be cleaned with antibacterial wipes / spray at the start of each shift, when an operator moves onto</p>							
--	--	--	--	--	--	--	--	--	--

		<p>another machine and at the end of the shift.</p> <p>12. Internal track and trace system implemented.</p> <p>13. Where practical, all doors, windows, and louvres should be open to aid ventilation.</p>							
Hazardous substances	Workers, delivery / collection drivers, contractors, visitors and other persons in the vicinity of the workplace.	COSHH data stored for all products used in control of COVID-19	1 / 2 / 3 / 4	1	2	2	Maintain COSHH files with current MSDS (material safety data sheet) information.	External Resource (Temple)	Ongoing.
Potential emergency situations e.g. fire, explosions	Workers, delivery / collection drivers, contractors, visitors and other persons in the vicinity of the workplace.	Alcohol Hand Sanitiser to be placed away from heat source.	1 / 2 / 3 / 4	1	2	2	Monitor & review.		
Human Factors	Workers.	1. Temperature screening (non-contact thermal thermometer for site Visitors / Contractors (SOP 62)).	1 / 2 / 3 / 4	1	2	2	<p>1. SOP 62 to be updated.</p> <p>2. Monitor &amp; review.</p>	<p>1. Rachel Lane / Rebecca Noble / Chris O'Sullivan /</p>	<p>1. 23/07/2021</p> <p>2. Complete</p>

		<p>2. World Health Organisation Handwashing techniques displayed in all toilets (shop floor &amp; offices).</p> <p>3. All employees are encouraged to give feedback on the adequacy and / or suitability of safety arrangements without fear of recrimination.</p> <p>4. All employees are instructed to remove themselves from situations / work activities which do not give sufficient protection to themselves or their colleagues.</p> <p>5. Management allowing employees to leave work to go and get their NHS COVID-19 vaccination. There is no discouragement from the management team.</p>				<p>3. Monitor &amp; review.</p> <p>4. Monitor &amp; review.</p> <p>5. No further action</p>	<p>Paul Reeves / Maintenance</p>

## Likelihood (L) x Severity (S) = Risk Rating (RR)

(L X S = RR)		SEVERITY (S)		
		Slightly harmful (1)	Harmful (2)	Extremely Harmful (3)
LIKELIHOOD (L)	Highly Unlikely (1)	1 (Low)	2 (Low)	3 (Medium)
	Possible (2)	2 (Low)	4 (Medium)	6 (High)
	Probable (3)	3 (Medium)	6 (High)	9 (High)

1 – 2	Risk Tolerable - No further action required – work may proceed
3-4	Consider further controls where possible.
5-9	Risk intolerable – additional control measures required before work continues.

## Hierarchy of Control

Once the need for control measures has been identified, apply the following principles of prevention in designing these measures:

1. **Eliminate** the hazard
2. **Substitute** with less hazardous processes, operations, material or equipment
3. **Engineering** Controls and re-organization of work
4. **Administrative** controls – including training and use of adequate PPE.

This is intended as a hierarchy since the effectiveness reduces as you work down the list as well as the ease with which control measures are implemented and maintained.

Additional principles to apply in defining control measures:

- Adapt the work to the individual (design of workplace) taking account of individual mental and physical capabilities;
- Take advantage of technical progress to improve controls, e.g. To achieve further automation
- Develop a set of controls that covers technology, organisation of work, working conditions, psychosocial factors and the influence of factors relating to the working environment.
- Give collective protective measures priority over individual protective measures, e.g. restricted access areas such as switch rooms, high noise areas.
- Consider the need to introduce planned maintenance, such as regular extraction system maintenance, servicing of guards and interlocks or lubrication.
- Establish a positive safety culture so that avoidance, prevention and reduction of risks are accepted as the organisation's approach to all its activities.
- Consider the need for emergency arrangements such as alarm systems and back-up controls;
- Develop emergency/evacuation plans and provide emergency equipment as well as training.
